

# Shrek's Swamp Sludge

## What you'll need:

- 1/2 cup cornstarch
- Up to 1/2 cup water
- Green food coloring or natural color

- 1** Add your water and a few drops of food color into a craft bowl and give it a mix.
- 2** In a larger craft container, place your cornstarch and start adding water a tablespoon at a time, mixing until it becomes a slimy consistency.
- 3** Now, let's test your sludge! When you scoop it up, it should slowly drip. But when you roll it in your hands and put pressure, it should keep its shape.

**Shrek's Tip:** If it's too dry, add more water. If it's too wet, add more cornstarch.
